better drivers. lower risk. safer communities.

Samba DriverMonitor®

SambaSafety® is the industry leader in Driver Risk Management solutions. Our expertise starts with identifying risky drivers at the beginning of the hiring process and continues throughout their employment as drivers for your organization. Our driver monitoring package gives you complete driver visibility as the only solution on the market today with a national MVR and driver monitoring network.

Samba DriverMonitor® automates the management of driver-related information for your commercial and non-commercial drivers. It manages all driver data and automatically checks for new violations, DUI/DWI convictions, invalid licenses and approaching license or medical certification expiration dates. This industry-leading approach continuously monitors drivers for risky behavior and compliance issues and provides timely, actionable alerts when new activity occurs. It enables more efficient enforcement of your driver safety policy and places you only two clicks away from identifying your most critical drivers.

Samba DriverMonitor® is made up of these industry-leading features:

Samba ReportManager℠
This function provides safety managers the ability to quickly and accurately evaluate driver behavior through real-time reports. The reports are configurable and provide the tools needed to incorporate in a variety of safety processes.

Streamlined Driver Upload
Allows safety managers to add, update and delete drivers with ease and accuracy. All processing happens in the background while you work.

Additional DriverMonitor® Features

- Provides timely alerts on drivers with recent MVR activity
- Manages DOT medical certifications and expirations
- Monitors and reports on drivers by type, location or division
- Sets policy for annual MVR purchases for your drivers (manually, at date-of-hire, at a specific date or dynamically)
- Provides accurate and consistent application of your driver safety policies across geographic or jurisdictional boundaries
- Schedules appropriate online driver training classes for high-risk drivers
- Summarizes all recent driver activity into a simple, user-friendly dashboard
- Archives reports and individual driver data in a secure database for viewing 24/7

Driver Lifecycle Management

In today's environment, companies can't afford to hire or employ unsafe drivers. Risky drivers can put your business and its reputation at risk. The Driver Lifecycle Management begins during the hiring process and continues with a comprehensive, continuous solution designed to limit your exposure and control costs.

Your ability to *Identify*, *Monitor* and *Modify* behavior is the key to SambaSafety® Driver Risk Management. Contact us today to mitigate risk, enforce safety and protect what's important.

Benchmarking
How are you performing compared to others?

Incentives
Any positive reinforcements for safe drivers?

Online Training
Is your training targeted and effective?

Policy Enforcement
Are you ensuring drivers perform to policy?

Compliance
Do you have all your driver releases on file?

MVR Records
Do you have a full picture of your driver's history?

Driver Scoring
How do your drivers score against company priorities and industry standards?

Samba MVRSync™
How can you leverage pre-hire MVRs for post-hire driver monitoring?

Modify   Identify

Analyze

Continuous Monitoring
Are you informed of up-to-date driver violations?

Incident Tracking
Are you tracking drivers on the road?

Crash Tracking
Who is having accidents and at what cost?

System Integration
Integrate 3rd party systems via simple API?
